

# CURRICULUM VITAE

## SARA C. MEDNICK, PHD

University of California, Irvine  
Department of Cognitive Sciences, School of Social Sciences  
2201 Social & Behavioral Sciences Gateway  
Irvine, CA 92697-5100  
[mednicks@uci.edu](mailto:mednicks@uci.edu)  
[www.sleepandcognitionlab.com](http://www.sleepandcognitionlab.com)  
[ORCID: 0000-0002-0906-3097](https://orcid.org/0000-0002-0906-3097)

### Education

1990-1994 B.A. Drama/Dance, Bard College, Annandale-on-Hudson, NY  
1992-1993 B.A. Year Abroad, Charles University, Prague, Czech Republic  
1997-2003 Ph.D. Psychology, Harvard University, Cambridge, MA.  
Advisors: Ken Nakayama and Robert Stickgold  
2003-2006 Post Doc, Salk Institute for Biological Studies  
Advisors: Geoffrey Boynton and Sean P.A. Drummond

### Positions and Employment

1996-1997 Research Assistant, James C.Y. Chou, MD, Department of Psychiatry, New York University, Bellevue Hospital, NY  
1996-1997 Internship, Mark Serper, MD, New York University Bellevue Hospital, NY,  
1996-1997 Internship, Cynthia Green, MD Mt Sinai Hospital, NY  
1998-1999 Research Assistant, Phil Holzman, MD, Department of Psychology, Harvard University, Mclean Hospital, Belmont, MA,  
2003-2006 Research Fellow: The Salk Institute for Biological Studies, Systems Neurobiology Lab, (Geoffrey M. Boynton, PhD: mentor), University of California San Diego and Veterans Affairs San Diego Health Care System, The Laboratory for Sleep and Behavioral Neuroscience (Sean P.A. Drummond, PhD: mentor)  
2007-2011 Assistant Project Scientist, Department of Psychiatry, UCSD  
2011-2016 Assistant Professor, Department of Psychology, UC Riverside  
2016-2017 Associate Professor, Department of Psychology, UC Riverside  
2017 Associate Professor, Department of Psychology, UC Irvine

### Fellowships, Honors and Awards

2015 Department of Defense, Young Investigator Prize  
2013 University of Sydney, Visiting Scholar Award  
2012-13 University of California, Riverside Academic Senate Regents Award  
2008-9 University of California, San Diego Academic Senate Award  
2007-12 National Institutes of Mental Health, K01 Career Development Award (NIMH-K01MH080992)  
2008 Invited speakers at National Academy of Sciences, Irvine CA  
2007 Invited Speaker to Oasis  
2006 Defense Advanced Research Projects Agency (DARPA) Award  
2006 APSS conference abstract excellence award  
2005 APSS conference travel award  
2004 Society for Research Fellows Speaker Award 2004, Salk Institute for Biological Studies La Jolla, CA  
2003-7 National Institutes of Mental Health, Ruth L Kirschstein National Research Service Award (NEI)

### Professional Society Memberships

2000 Society for Neuroscience  
2000 Vision Sciences Society  
2003 Sleep Research Society  
2011 Center for Circadian Biology

## Research Support

### Ongoing

2015-2018 DoD Young Investigator Prize  
(\$375,526)

Heart rate variability during daytime naps as a predictor of memory consolidation in healthy, well-rested adults.  
We propose to investigate the role of autonomic function in memory consolidation by examining how the fluctuations in cardiovascular output during sleep are related to sleep-dependent memory consolidation. We will specifically examine this question in the framework of daytime sleep (i.e., naps) that: 1) are used by many to supplement nighttime sleep, 2) show the same cognitive benefits as nighttime sleep (Mednick, Nakayama et al. 2003), and 3) have strong translational significance. Surprisingly little is known about cardiovascular output during naps. Given the importance of sleep for memory consolidation, and autonomic function for sleep and cognition, our findings may provide a unifying connection between autonomic function, sleep, and memory consolidation. The goal of the current proposal is to thoroughly investigate this HRV phenomenon as a bioassay for memory consolidation during sleep, which would be a less expensive and easier alternative than the current gold standard of in-lab polysomnography (PSG).

2015-2017 DARPA Principal Investigator: Teledyne Scientific and Imaging; Stephen Simons  
(Mednick: Subcontract Performer)  
(\$10,000,000)

### Targeted Stimulation for Enhancing Replay (TASER)

A 24-month program to develop model-based interventions that use sensory cueing and memory-type specific localization of transcranial alternating current stimulation (tACS) to enhance sleep spindles and improve replay. The project focuses on three primary areas: 1) human task performance, 2) quantification of memory replay and 3) interventions, and the challenges associated with advancing them to reach our proposed solution.

2014-2017 DoD N00014-14-1-0513 Principal Investigator: Mednick  
(\$995,381)

### The effect of psychostimulants and zolpidem on sleep and cognitive performance.

The goal of these studies is to develop a pharmacological intervention to enhance cognitive processes that are vulnerable to fatigue, including learning and memory, sustained attention and response control, attentional tracking, and emotional processing. The completion of these studies will lead to better understanding of the impact of psychostimulants (“smart pills”) and sleep drugs on cognition and sleep in healthy young adults. This knowledge can be used to help treatment strategies and to understand interactions of these drugs with normal functioning and enhanced cognition. These studies will also address the growing trend in college students to use these so-called “smart pills” for cognitive enhancement, a trend that has received little experimental attention.

2014-2019 NIA R01AG046646 Principal Investigator: Mednick  
(\$1,250,000)

### The critical role of sleep spindles in memory consolidation.

The central aim of this application is to use pharmacological intervention to address the specificity of sleep-dependent memory with respect to 1) sleep feature (i.e., sleep spindles vs. other sleep features), 2) memory domain (i.e. declarative vs. non-declarative), and 3) pharmacological agents (i.e., zolpidem (GABAa) vs. sodium oxybate (GABAb) vs. placebo). Establishing a link between correlational sleep studies and pharmacological interventions that target precise memory domains will allow us to determine the sleep features that are critical for memory consolidation. With this knowledge, we will adapt this pharmacological approach for testing in older adults. We will investigate the hypothesis that pharmacologically boosting sleep spindles in older adults will improve declarative memory, compared with non-declarative memory and placebo.

2013-2018 ONR (MURI) N000141310672 Principal Investigator: Bazhenov (Mednick: consultant)  
(\$7.5 million)

## Memory Consolidation During Sleep in Humans, Rodents and Computational Models

The goal of this project is to develop large-scale computer models of thalamo-cortico-hippocampal system to explain the role of sleep rhythms in memory consolidation based on animal and human data.

2014-2017 Principal Investigator: Mednick, Co-I: Michael Silver (UC Berkeley)  
NSF Cognitive Neuroscience BCS1439210  
(\$315,350 over three years)

### Cholinergic and sleep regulation of human memory and learning

This project started September 2014. **Intellectual Merit:** The objective of this award is to systematically and experimentally modulate a single neurotransmitter that is known for its importance in memory and learning (i.e., acetylcholine). This neurotransmitter will be modulated across the four stages of memory processing: encoding, waking consolidation, sleep consolidation, and retrieval. We will use an acetylcholinesterase inhibitor that enhances function only at cholinergic synapses that are releasing acetylcholine during a particular cognitive process. The role of cholinergic processing will be examined during the four stages of declarative and non-declarative memory processing. **Broader Impacts:** Information from these findings can be used to enhance basic memory or impaired memory. We will also train many undergraduate and graduate students, including females and minority students at UCR.

### **Completed**

2012-2013 Principal Investigator: UC Riverside Academic Senate Regents Award  
(\$13,000/year 2012-2013)

Investigating the role of anterograde amnesia in memory consolidation.

This award will allow the Mednick lab to expand on findings from the K01 in which we showed that that zolpidem augmented sleep spindles and promoted verbal memory greater than sleep alone. One aspect of zolpidem is post-administration, anterograde amnesia. The current study will examine the relationship between exceptional verbal memory and amnesia.

2007-2012 Principal Investigator: K01 Career Development Award (K01MH080992 – 01)

Understanding memory consolidation by studying pharmacologically enhanced naps

The Career award enabled me to add pharmacological mechanisms to my set of tools for exploring sleep-dependent memory consolidation. The goal of this grant is to understand the pharmacological basis for sleep-dependent memory consolidation. Over five years, I will be running three studies, 1) a dose response nap study, 2) a nap study with two optimal doses of drugs that enhance SWS and stage two sleep, examining the effect of pharmacologically enhanced naps on three different memory domains, and 3) an fMRI study examining the brain mechanisms of pharmacological manipulation of sleep stages on memory consolidation.

2007-2012 Jazz Pharmaceuticals Investigator initiated study

This grant supported my K01 with sodium oxybate and placebo

2006 – 2007 Defense Advanced Research Projects Agency (DARPA)

Comparing the effects of Modafinil, Napping and Caffeine on perceptual learning and deterioration.

This study compared common fatigue countermeasures, placebo and sleep on three different forms of memory: perception, motor, and verbal declarative. We found discrete enhancements and decreases in performance in the drug and sleep conditions, which suggests that different underlying mechanisms support these different memory domains.

2008-2009 UCSD Academic Senate Award

The effects of illumination on nap architecture

The goal of this study is to examine whether daytime sleep is affected by light using light emitting goggles of across a wide range of intensities. We found the unlike nighttime sleep, illumination does not interfere with sleep onset or sleep architecture in a daytime nap.

- 40) Schapiro, A.C., Rogers, T.T., Norman, K.A., Chen, L., McDevitt, E.A., Mednick, S.C. (2013, June). The role of sleep in consolidating semantic knowledge. Poster presented at SLEEP, Baltimore, MD.
- 41) Schapiro, A.C., Rogers, T.T., Norman, K.A., Chen, L., McDevitt, E.A., Mednick, S.C. (2013, May). The role of sleep in consolidating semantic knowledge. Poster presented at the Vision Sciences Society Meeting, Naples, FL.
- 42) McDevitt EA, Kaestner E, Wixted J, Mednick SC (June, 2013). Pharmacologically increasing sleep spindles enhances recognition for negative and high-arousal emotional memories. Talk to be presented at the 27th Annual Meeting of the Associated Professional Sleep Societies, Baltimore, MD.
- 43) Ricker AA, Cellini N, Duggan KA, McDevitt EA, Rowe KM, Mednick SC (June, 2013). Are “smart” alarm clocks effective at improving waking experience following a daytime nap? Poster to be presented at the 27th Annual Meeting of the Associated Professional Sleep Societies, Baltimore, MD.
- 44) Rowe KM, McDevitt EA, Cellini N, Duggan KA, Ricker AA, Mednick SC (June, 2013). Zolpidem increases subjective sleep time estimations in daytime naps. Poster to be presented at the 27th Annual Meeting of the Associated Professional Sleep Societies, Baltimore, MD.
- 45) Duggan KA, Friedman HS, McDevitt EA, Cellini N, Ricker AA, Rowe KM, Mednick SC (June, 2013). The importance of personality for sleep health. Poster to be presented at the 27th Annual Meeting of the Associated Professional Sleep Societies, Baltimore, MD.
- 46) Cellini N, McDevitt EA, Ricker AA, Rowe KM, Duggan KA, Mednick SC (June, 2013). Assessment of an automated wireless system for sleep monitoring in daytime naps. Talk to be presented at the 27th Annual Meeting of the Associated Professional Sleep Societies, Baltimore, MD.
- 47) Buman M, Cellini N, McDevitt EA, Gutierrez M, Brinkman J, Ricker A, Mednick SC (under review). Free-living validation of Actigraph-GT3x+ and Actiwatch-64 for 24h monitoring in healthy young adults. Under review for presentation at the 3rd International Conference on Ambulatory Monitoring of Physical Activity and Movement, Amherst, MA (June, 2013).
- 48) McDevitt EA, Afraz A, Mednick SC (May, 2013). Consolidation of associative face memory during sleep is related to spatial position. Poster presented at the Annual Meeting of the Vision Sciences Society, Naples, FL.
- 49) Cellini N, Goodbourn PT, McDevitt EA, Holcombe AO, Martini P, Mednick SC (May, 2013). A daytime nap reduces the attentional blink. Poster presented at the Annual Meeting of the Vision Sciences Society, Naples, FL.
- 50) Peters M, McDevitt EA, Sheremata S, Mednick SC, Silver MA (April, 2013). Cholinergic enhancement of single session perceptual learning is location specific. Poster presented at the Annual Meeting of the Cognitive Neuroscience Society, San Francisco, CA.
- 51) Oh, E. S., Duggan, K. A., McDevitt, E. A., & Mednick, S. C. (2013, May). Can't sleep? Maybe you're blue? The relationship between sleep quality, stress, depression, and nap frequency. Poster presented at the UCLA Psychology Undergraduate Research Conference, Los Angeles, CA.
- 52) Rowe, K. M., McDevitt, E. A., Cellini, N., Ricker, A. A., Duggan, K. A., & Mednick, S. C. (2013, February). Time distortion during sleep. Poster presented at the Time In Mental Activity Conference and Training Program, Corfu, Greece.
- 53) Duggan, K. A., McDevitt, E. A., Whitehurst, L. N., & Mednick, S. C. (2014, June). *The association between napping and nighttime sleep quality using self-reports and actigraphy*. Poster presented at the annual meeting of the Associated Professional Sleep Societies (SLEEP), Minneapolis, MN.
- 54) Duggan, K. A., McDevitt, E. A., Whitehurst, L. N., & Mednick, S. C. (2014, June). *Why do people nap? A factor analysis of self-reported sleep habits*. Talk presented at the annual meeting of the Associated Professional Sleep Societies (SLEEP), Minneapolis, MN.
- 55) McDevitt EA, Whitehurst LN, Duggan KA, Mednick SC (May, 2014). Individual differences in sleep-dependent perceptual learning: Habitual vs. non-habitual nappers. Poster presented at the Annual Meeting of the Vision Science Society, St. Pete Beach, FL.
- 56) McDevitt EA, Whitehurst LN, Duggan KA, Mednick SC (June, 2014). Individual differences in sleep spindles and sleep-dependent memory: The impact of habitual napping. Poster presented at the 28th Annual Meeting of the Associated Professional Sleep Societies, Minneapolis, MN.

- 57) Whitehurst LN, Cellini N, McDevitt EA, Duggan KA, Mednick SC (June, 2014). Evidence for a daytime nap as a “cardiovascular break”. Poster to be presented at the 28<sup>th</sup> Annual Meeting of the Associated Professional Sleep Societies, Minneapolis, MI.
- 58) Cellini N, Whitehurst LN, McDevitt EA, Mednick SC (June, 2014). Short-term reliability of heart rate variability measures in a daytime nap. Poster at the 28<sup>th</sup> Annual Meeting of the Associated Professional Sleep Societies, Minneapolis, MI.
- 59) Reihanabad NA, Whitehurst LN, McDevitt EA, Duggan KA, Dela Cruz AL, Perera CA, Mednick SC (June, 2014). The impact of habitual napping on sleep: Spindles and slow wave activity. Poster at the 28<sup>th</sup> Annual Meeting of the Associated Professional Sleep Societies, Minneapolis, MI.
- 60) Perera CA, McDevitt EA, Duggan KA, Whitehurst LN, Reihanabad NA, Dela Cruz AL, Mednick SC (June 2014) Individual differences in sleep-related benefits for creative insight. Poster presented at the 28<sup>th</sup> Annual Meeting of the Associated Professional Sleep Societies, Minneapolis, MN.
- 61) Dela Cruz, A.L., Duggan, K.A., McDevitt, E.A., Whitehurst, L.N., Oh, E., Perera, C.A., Reihanabad, N.A., Mednick, S.C. (June 2014). Associations between napping and subjective sleep quality: the role of stress, depression, and general health. Poster presented at the 28th meeting of Associated Professional Sleep Societies (SLEEP), Minneapolis, MN.

**Oral Presentation Chair Session Moderator**

- 2009 APSS “O22: Sleep and Memory Consolidation”
- 2010 VSS “Perceptual learning: Plasticity and adaptation”
- 2010 APSS “O03: Memory Consolidation, Sleep Staging and Naps,”
- 2010 APA “ The role of sleep in memory and cognition”
- 2014 APSS “Sleep and Circadian Dysregulation”

**Symposium Organizer**

- 2010 AAAS “The role of sleep in memory from development to old age”  
speakers: Lynn Nadel, Matthew Walker, Marcos Frank, Sean Drummond, Sara Mednick
- 2015 COSYNE, “What can sleep tell us about memory consolidation?”
- 2016 APSS, “From Circuitry to Behavior: The Role of Sleep in Memory Consolidation.”

**Invited Editorials**

- 2007 “Nap time: How a little sleep can change your life”, Union Tribune,
- 2007 “Nodding Off”, GOOD
- 2010 “The workplace coffee effect”, Room for Debate, New York Times

**Selection of Invited Talks**

- 2000 Circadian Rhythm Group, Harvard Medical School, Boston, MA
- 2002 Princeton University, Princeton, New Jersey.
- 2002 Charles University, Prague, Czech Republic.
- 2002 Center for Human Information Processing, UCSD, La Jolla CA.
- 2002 University of Southern California, Los Angeles, CA.

2017 University of Virginia

My research has been covered by CNN, Reuters TV, NPR, The Economist, The Wall Street Journal,

Consumer Reports Health Journal, Reader's Digest, The New York Times and many other major media outlets in the US and internationally. Below is a sample from over 300 publications.

### Television & Radio

1. Brain Games, NatGeo, 2015
2. OWN show, Oprah Network, 2014
3. Kudlow Report CNBC, Sept 2013
4. Airtalk, NPR, Sept 2010
5. "What are Dreams?" Science NOVA, August, 2009
6. Interview, BBC, Jun 15, 2009
7. How creative are you when you're sleeping? *Voice of America*, Jun 13, 2009
8. UC San Diego Takes a Nap. *KPBS* Mar 9, 2009
9. Talk of The Nation. *NPR* Jun 25, 2007
10. It's time you took a nap! *NPR*, Jun 5, 2007
11. Should we nap at work? *Good Morning America*, Jan 27, 2007

### Selected Press

1. Sleep, How to nap like a pro, BBC News, 2015
2. O Magazine: Sleep Better from A to ZZZ's, 2014
3. The perfect nap: sleep is a mix of art and science. *Wall Street Journal* 2013
4. Scientist as Star: *Nature* 2010
5. Businesses waking up the benefit of napping, Bloomberg Businessweek Sept 2010
6. Better Performance After a Dreaming Nap, *New York Times*, June 2009
7. Problems are solved by sleeping. *Tehran Times* Jun 12, 2009
8. Dopo un sogno ci svegliamo più creativi. *Corriere della Sera* Jun 9, 2009
9. Let Me Sleep On It: Creative Problem Solving Enhanced By REM Sleep. *Science Daily* June 9, 2009
10. Problems are solved by sleeping. *BBC News* Jun 9, 2009
11. The Consult: Back to Bed. *Newsweek* Jun 9, 2009
12. Tests find benefit of sleeping on job. *Independent* Jun 8, 2009
13. The power of naps. *San Diego Union Tribune* (Cover) May 10 2009
14. 2008 Tuesday Morning Quarterback Person of the Year: Sara Mednick, *ESPN* Jan 6, 2009
15. A wake-up call for the sleep deprived *MSNBC* Nov 24, 2008
16. A Daytime Nap Can Boost Memory. *The Washington Post*, Feb 1 2008
17. Scientists still searching for the secrets of sleep. *The Wall Street Journal*, Jan 18, 2008
18. An awakening to nap time. *USA TODAY*, Mar 5, 2007
19. Take five? Researchers say grab an hour. *The Scientist*, Jan 1, 2007
20. Not getting enough sleep? *The Boston Globe*, Apr 2, 2006
21. But a quick nap shows. *The Wall Street Journal*, Nov 17, 2004
22. Napping may be beneficial. *National Public Radio*, Jul 4, 2003
23. Power nappers do it better. *Times of India*, Jun 28, 2003
24. Could 40 winks provide more than a battery recharge? *The Lancet*, Jun 28, 2003
25. Daytime nap is as refreshing as a night's. *The Daily Telegraph* (London), Jun 23, 2003
26. Day dreams as good as a night's sleep. *The Guardian* (London), Jun 23, 2003
27. The power of sleep. *The Boston Globe*, Jan 28, 2003
28. Sleep with the boss. *New Scientist*, Jun 1, 2002
29. Siesta time. *The Economist*, Jun 1, 2002
30. A Quick Power Nap's Benefits. *The New York Times*, May 28, 2002
